Points given for performance in each event. The better the performance, the more points

Each Event, Each Gender and each Age Group uses a different set of points.

The total from all five events determines the ranking in a given age and gender group

Athletes must start all five events to be considered in the ranking.

If they don't finish an event then they get zero points for that event.

To be competitive an athlete should probably be good in at least three of the five events.
